CABQ staff,

The US-CERT (United States Computer Emergency Readiness Team has discovered several vulnerabilities in the Mozilla products to include the following applications.

- Firefox 21.0 -internet browser
- Firefox ESR 17.0.6
- Thunderbird 17.0.6 Thunderbird is an email, newsgroup, news feed and chat (<u>XMPP</u>, <u>IRC</u>, <u>Twitter</u>) client.
- Thunderbird ESR 17.0.6

US-CERT Notification: Mozilla Releases Multiple Updates 05/16/2013 08:46 AM EDT

Original release date: May 16, 2013

The Mozilla Foundation has released updates for the following products to address multiple vulnerabilities.

- Firefox 21.0
- Firefox ESR 17.0.6
- Thunderbird 17.0.6
- Thunderbird ESR 17.0.6

These vulnerabilities could allow an attacker to execute arbitrary code, cause a denialof-service condition, obtain sensitive information, or operate with elevated privileges.

US-CERT encourages users and administrators to review the Mozilla Foundation Advisory for <u>Firefox 21.0</u>, <u>Firefox ESR 17.0.6</u>, <u>Thunderbird 17.0.6</u>, and <u>Thunderbird ESR</u> <u>17.0.6</u> and apply any necessary updates to help mitigate the risk.

Update Firefox to the latest version

Firefox automatically updates itself. This article explains how the update process works and how to manually check for updates.

How do automatic updates work?

By default, Firefox is configured to automatically check for updates.

- Updates will be downloaded in the background and installed when you restart Firefox.
- If an update has been waiting to be installed for more than 24 hours, you'll see a notification with the option to restart Firefox and install the update.

How do I manually check for updates?

At any time, you can check for updates.

- 1. At the top of the Firefox window click the Firefox button, go over to the Help menu and select About Firefox. **For Windows XP:** Go to the Help menu and select About Firefox.
- 2. The **About Firefox** window will open and Firefox will begin checking for updates. If updates are available, they will begin downloading automatically. If

Firefox is already up to date, just close the **About Firefox** window.

3. When the updates are downloaded and ready to be installed, click Restart to Update. Firefox will be restarted and the updates will be installed.
