

Configuring a phone for VPN

Cisco AnyConnect Secure Mobility Client

The preferred method of using VPN on a cell phone is by using the AnyConnect application.

This is an SSL VPN solution from Cisco that is available for download in the App Market on your phone. iPhones, iPads, and most new Droids support this app.

To Configure AnyConnect use the following settings:

Description: COA

Server Address: vpn.cabq.gov

Press Save. To login, simply enter your Exchange username and password.

If you receive the message that you are not authorized access, you will be required to submit an approved VPN request form.

Please read the terms and conditions of VPN usage and submit a VPN request form to the ITSD Service Desk. The form is available on eweb.cabq.gov or contact the ITSD Service Desk at 768-2930 and the terms and conditions and VPN access form will be provided to you.
