

NETWORK ACCESS POLICY

ORIGINATION DATE:	01/09/2013
EFFECTIVE DATE:	01/09/2013
VERSION:	3.0
ISSUED BY:	DTI CYBERSECURITY
APPROVED BY:	ISC
DATE APPROVED:	05/12/2021 (REVISED)

1. SCOPE

Applies to all devices and systems connected to networks owned and managed by the City of Albuquerque.

2. POLICY STATEMENT

- a. City network access is not a universal benefit and may be revoked at any time.
- b. Account holders are accountable for all activities associated with their accounts.
- c. Devices and systems directly connected through any means to the City's networks shall adhere to City cybersecurity policies. At no time will traffic bypass City of Albuquerque data security measures. The Director or designee of the Department of Technology and Innovation may approve any exceptions.
- d. The Technical Review Committee, in conjunction with Department of Technology and Innovation, shall:
 - i. Establish business and cybersecurity protocols and standards for access to the City's networks.
 - ii. Establish business and cybersecurity protocols and standards for modem, routing, switching and wireless devices used to connect to City network assets.
 - iii. Establish cybersecurity awareness and training standards
 - iv. Annually review all business and cybersecurity protocols and standards established under this policy

3. RATIONALE

The City's networks provide access to critical City and community assets. The City's technical resources have an obligation to protect those assets in the interest of the public.
